

INTRODUCTION

MainStreet Technologies (MST) delivers data and document management solutions to Federal, State and Local Government agencies, as well as financial institutions and organizations that must record and manage volumes of information. MST's clients share a critical need to compile and store data, while providing convenient, yet vital access to it. MST Government Record Management systems automate the collection and distribution of critical documents, facility drawings, and other information associated with all phases of Government.

QUALIFICATION

MST has provided *data management, document imaging, quality control and verification reporting, archiving, microfilm creation, data conversion, full service record indexing and full service data entry* services for Government and business since 1999. The firm's technically advanced solutions for the aforementioned services are being utilized and employed by over 80% of the county governments in the State of Georgia. These county Governments rely on MST to automate the multitude of data and details related to their daily activities. The ability to research and share information in a timely manner has proven an enormous benefit for MST clients, delivering significant savings and improvements over previous processes and methods for organizing and accessing critical data. These capabilities will also provide Federal Government agencies with the same end results.

LEADERSHIP

Dalton T. Sirmans and Michael Jones founded MainStreet Technologies in 1999. Dalton earned his Bachelor's degree from Valdosta State University in criminal justice and sociology. He is responsible for the overall business leadership of MST, including sales and marketing strategy. Michael holds a Bachelor's degree in Computer Science from the University of Georgia and a Masters degree in Computer Science from the Georgia

Institute of Technology. He oversees software development and technical operations at MST. Michael's relationship with Georgia Tech continued as a software engineer for more than 13 years, developing document imaging and indexing applications for the Georgia Superior Court Clerks Cooperative Authority in Atlanta, as well as projects for the U.S. Army.

CORE COMPETENCIES

Data Management Services

- Land Records
- Medical Records
